Recommended By Professionals

Ian Coley - GB Team shooting coach.

Ian Coley said - "I found CENS digital very comfortable to wear for long periods, and they are much better to wear than ear-muffs because they give you the advantage of being able to hear various noises from different directions."

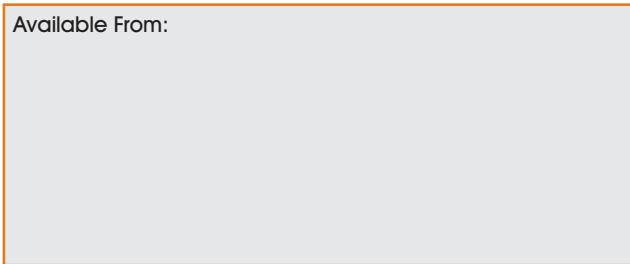

Mark Stone - Shooting and firearms journalist.

Mark Stone said - "Having worn a pair of CENS digital for the past few months, there's no way I'll go back to wearing anything else. The ability to detect approaching game has to be heard to be believed."

CENS ProFlex digital

Custom Electronic Noise Suppressors

The Ultimate In Custom Noise Suppression

Evolution in gunshot noise reduction continues with the smaller CENS ProFlex electronic module combined with unique multi-softness custom fit ear moulds. This new unique design combines superb functionality with an eye catching appearance, and this latest development leads the trend towards obstruction free, comfortable custom noise suppression for today's shooter.

The sound of a gunshot at close range can irreversibly damage your hearing for life, and that's a fact! Effectively suppress gunshot noise with new CENS ProFlex.

- Instantly suppresses harmful gunshot noise.
- Allows for normal conversation and the use of mobile phones without the removal of your noise suppression.
- Hear releasing traps and approaching game before anyone else.
- No gun mount interference.

Each pair of CENS ProFlex are custom-made for a perfect fit, ensuring maximum wearing comfort over many hours without the need to be removed.

Features Of CENS ProFlex

CENS ProFlex feature a new unique design and material to make them easy to clean and maintain, as well as to make them even more comfortable in the ear over long durations.

NEW Modular Design

The new miniature CENS ProFlex module houses the battery and volume control. The module also completely removes from the ear mould to allow for moisture and wax removal from the sound tube.

NEW Super Soft Silicone Tip

Another unique feature to CENS ProFlex is the multi softness of the ear moulds. The main shell of the ear mould is made of hard but flexible silicone for a secure fit in the ear. The canal tip of the ear mould is made from a super soft silicone material, to provide optimum comfort.

Being transparent also allows you to easily see when your ear moulds require cleaning.

CENS ProFlex digital

CENS ProFlex are available in 2 models:

CENS ProFlex digital 1: The standard noise suppression plugs, featuring a volume control and soft canal tip. The single program electronics instantly suppress loud gunshot noise, while also boosting ambient sounds.

CENS ProFlex digital 2: Advanced noise suppression plugs, featuring a volume control and soft canal tip. They also feature two pre-programmed settings for use in clay or game shooting situations. These settings enhance the hearing and noise suppression capabilities depending on your environment, to give you an even better experience.

CENS ProFlex HUNTER

CENS ProFlex Hunter are designed especially with the rifle marksman in mind. The brand new state-of-the-art digital circuitry inside every CENS ProFlex Hunter is able to suppress the louder gunshot noise generated by rifle and large calibre ammunition. CENS ProFlex Hunter are also great for shotgun shooters.

CENS ProFlex Hunter features two pre-programmed settings; standard and extra wind noise reduction. This second setting provides increased wind noise reduction, without losing the ability to hear sounds such as wing beats and animal cries. Every pair is supplied with CENS Wind Shields that fit over the ear, cutting down wind noise even further when using a high chair or when shooting in severe conditions.

CENS ProFlex Hunter also feature the same modular design as CENS ProFlex digital.

CENS Hunter Wind Shields
